Dear Customer,

We are writing to inform you about a security incident that occurred on October 30th. We detected fraudulent charges originating from our Stripe.com payment gateway, which was compromised.

We have immediately stopped all unauthorized transactions and initiated refunds for all fraudulent charges. These refunds should be processed and reflected in your account within the next 2-3 business days. We are currently working with Stripe to investigate this matter thoroughly.

While Stripe has assured us that your card information was not compromised during this incident, we recommend taking any necessary precautions to ensure the security of your payment card details.

We appreciate your patience as we resolve this issue with Stripe and will continue to monitor our accounts closely over the coming days.

Regards,
Suchir Sen
