Re: Notice of Security Incident

Dear Ms. Brooke:

Kindly note that I am legal counsel for USNR LLC ("USNR"). I write regarding a recent data security incident at USNR.

On or about October 25, 2020, USNR detected that its systems were encrypted. Upon a thorough investigation, USNR determined that the individuals behind the encryption hacked into their system some weeks prior (unbeknownst to USNR) and, as a result, may have accessed select personal information relating to USNR employees, including 1,368 Washington residents. USNR internal teams worked diligently with forensic consultants to restore and secure the impacted systems and are engaging in a detailed review of USNR cybersecurity policies and procedures.

A sample notification is attached. The data subjects will be notified on December 7, 2020.

If you have any questions or require any additional information, please do not hesitate to contact me directly. Thank you.

Very truly yours,

Desiree F. Moore

Notice of Security Incident

Dear [REDACTED] :

We are writing to inform you about a data security incident that may have exposed some of your personal information. USNR takes the protection and proper use of your information very seriously. For this reason, we are contacting you directly to explain the circumstances of the incident.

What happened?

On October 25, 2020, USNR, LLC (“USNR”) became aware of an intrusion into its data network that began on September 28, 2020. Specifically, unbeknownst to USNR, unknown individuals accessed USNR’s information systems and subsequently launched an attack designed to encrypt data files stored on its computer systems.

While the primary intent of the attack looks to have been to disrupt USNR’s operations, it appears that the intruders had the opportunity to access personal information relating to current and former USNR employees. This information potentially could have included: employee names, addresses, dates of birth, social security numbers, bank account information, and beneficiary information (including names, addresses, dates of birth, and social security numbers of beneficiaries). Please note that we have no evidence of such information being viewed, stolen, or otherwise misused as of the date of this letter.

What we are doing.

USNR is working with a leading third-party cybersecurity firm to rebuild its internal network and technology infrastructure, including securing all affected systems and engaging in a detailed review of its cybersecurity policies and procedures.

Additionally, to help relieve concerns and restore confidence following this incident, we have secured the services of Equifax to provide identity monitoring at no cost to you for one year. Equifax is a global leader in risk mitigation and response, and their team has extensive experience helping people who have potentially sustained an unintentional exposure of confidential data.

Additional information describing your services is included with this letter.

What you can do.

Please review the enclosed “Product Information” section included with this letter. This section describes the key features of the identity monitoring offering and how to enroll in identity monitoring. We have also included a resource guide with additional steps you can take to help protect yourself, including recommendations by the Federal Trade Commission regarding identity theft protection and details on how to place a fraud alert or a security freeze on your credit file.

For more information.

If you have questions, please call [hotline number], Monday through Friday from [REDACTED] to [REDACTED] Central Time.

Protecting your information is important to us. We trust that the steps we have taken and the services we are offering to you demonstrate our continued commitment to your security and well-being.

Sincerely,

Dale Brown
President and CEO

It is essential that each copy be legible, display your name and current mailing address, and the date of issue.
